SUMMARY

Economics graduate from the University of Waterloo with five co-op terms across legal tech, automotive and hospitality, plus a food startup co-founded at 19. Experience spans paid media, paid and organic social, SEO and content, email and webinar campaigns, affiliate tracking and CRM, on both the campaign side and the reporting side. Worked in attribution and tracking governance, funnel and MQL analysis, Looker and Power BI dashboards, and AI-automated reporting workflows built in Gemini and Claude.

EDUCATION

University of Waterloo — Honours Arts & Business and Honours Economics (Co-op), Finance Specialization Graduated 2026

Relevant coursework: Advanced Economics, Statistics, Business Finance, Principles of Marketing, Entrepreneurship & Digital Communication

SKILLS

- **Channel Management:** Paid media, paid and organic social, email marketing, webinar campaigns, social content calendars and posting schedules, budget pacing and bid optimization, GTM support
- **Paid Media & SEO Platforms:** Google Ads, Meta Ads Manager, Capterra, Software Advice, SEMrush, Ahrefs, SEO/SEM
- **Analytics & Business Intelligence:** Looker, Power BI (DAX), Tableau, Google Analytics 4, Advanced Excel (VBA, macros), SQL, campaign performance reporting
- **CRM, AI & Workspace:** Salesforce, Marketo, HubSpot, Claude, Gemini Enterprise, ChatGPT, Kimi, Lovable, AI-automated reporting workflows, Figma, Canva, CapCut, Notion, Asana, Zapier

PROFESSIONAL EXPERIENCE

Growth Marketing Analyst — Clio | Toronto, ON Jan 2025 – Aug 2025

- Automated weekly marketing reporting using Gemini and Looker, pulling live dashboard figures into Sheets with week-over-week change summaries; cut reporting time 25% per person and the process was adopted by marketing ops for other teams.
- Built Looker dashboards consolidating MQL and AQL reporting by channel, campaign, region and firm size, replacing several separate reports and becoming the source other teams reported from.
- Caught and resolved attribution gaps through weekly MQL spot-checks in Salesforce and Marketo, including a landing page credited with roughly half its actual conversions.
- Built a UTM naming convention for 100+ US affiliate partners, standardizing source, medium and campaign fields so partner performance stayed traceable.
- Reallocated paid social budget from Facebook to LinkedIn using W-shaped attribution analysis, increasing pipeline per dollar spent 7% quarter over quarter.
- Managed daily bidding on Capterra and Software Advice against competitor bids, holding top-3 placement across all product categories and moving from underspent months to full budget use.
- Defined a new high-intent MQL category around a product-stack configurator built at a company hackathon, where customers assembled a bundle and saw costs, benefits and recommendations live.

Business & Marketing Analyst — Litens Automotive Partnership | Toronto, ON Sept 2023 – Apr 2024

- Built monthly Google Analytics dashboards tracking website and landing-page performance alongside LinkedIn and Facebook engagement, followers and interactions.
- Led SEO and content updates across the website — copy, keyword matching, mobile layout, and converting image-based headings into indexable text.
- Grew LinkedIn engagement rate 12% month over month and followers 20% over six months through a revised posting schedule and in-house graphics and copy.
- Analyzed Tesla and BYD spend and revenue by segment to advise which EV category — batteries, charging or home storage — Litens should enter.

Marketing Analyst — The Corner House | New Delhi, India Jan 2021 – Aug 2021

- Grew quarterly revenue 15% through pricing changes, promotions and digital campaign optimization.
- Built Power BI dashboards tracking revenue, cost trends and efficiency ratios.
- Ran root-cause analysis on revenue swings, decomposing movements into occupancy, pricing and channel-mix effects to isolate what to act on.

PROJECTS

Chi & Chow — Co-founder & Operator | New Delhi, India Mar 2020 – Aug 2020

- Co-founded and scaled a Pan-Asian delivery brand to $8K revenue and $5K profit in four months, owning pricing, cost tracking, demand forecasting and supplier coordination.
- Ran acquisition through Instagram and WhatsApp, managing campaign budget and a small social team; attracted franchise interest from multiple cities.

Villa Performance Ledger

- Built an interactive KPI dashboard on a synthetic 19-month hospitality dataset where any marked month opens a live variance decomposition splitting the swing into occupancy, pricing and channel-mix effects.
